

Laptop Mini

Websurfer 8

The Websurfer 8 is a mini Laptop that provides rapid Internet access and efficient web-browsing. Its small size and light weight make the Websurfer 8 truly ultra-mobile. The Windows XP operating system ensures ease of use and a familiar interface. The battery provides hours of standby and usage time and the integrated touch pad obviates the need for an external mouse. High quality speakers allow the user to share his or her video clips, movies and favourite music with friends and family.
